 README

n8n-nodes-advbox

This is an n8n community node for [ADVBOX](#) API integration. It lets you manage customers, lawsuits, tasks, movements, transactions and settings directly from your n8n workflows.

[n8n](#) is a [fair-code licensed](#) workflow automation platform.

[Installation](#) | [Credentials](#) | [Operations](#) | [Development](#) | [License](#)

Installation

Follow the [installation guide](#) in the n8n community nodes documentation.

Via n8n UI

- Go to **Settings > Community Nodes**
- Click on **Install**
- Enter `n8n-nodes-advbox` in the **npm Package Name** field
- Click on **Install**

Via npm

```
npm install n8n-nodes-advbox
```

Credentials

To use the ADVBOX node, create credentials with:

Field	Required	Description
API Token	Yes	Your ADVBOX API token
API URL	Yes	The ADVBOX API URL (default: <code>https://app.advbox.com.br/api/v1</code>)
Agent Identifier	No	Optional identifier sent as <code>x-agent</code> header

Operations

Customer

Operation	Description
Create	Create a new customer
Get by ID	Get a customer by ID
Get Many	List customers with filters (name, phone, identification, document, email, city, state, occupation, date range)
Get Birthdays	Get customers with birthdays in the current month

Lawsuit

Operation	Description
Create	Create a new lawsuit
Get by ID	Get a lawsuit by ID
Get Many	List lawsuits with filters (name, process number, protocol number, customer, group, type, responsible, stage)
Get Task History	Get the task history for a lawsuit
Update	Update an existing lawsuit

Task

Operation	Description
Create	Create a new task with optional comments, scheduling, urgency and importance flags
Get Tasks	List tasks with filters (date range, user, lawsuit, deadline, completion status)

Movement

Operation	Description
Create	Create a manual movement for a lawsuit
Get History	Get movement history for a lawsuit

Transaction

Operation	Description
Get All	List transactions with filters (process number, customer, responsible, category, cost center, date ranges)
Create	Create a new financial transaction
Update	Update an existing transaction

Settings

Operation	Description

Get

Retrieve account settings (users, origins, task types, stages, lawsuit types)

Development

```
# Clone the repository
git clone https://github.com/ArthurSchabbach/n8n-nodes-advbox.git
cd n8n-nodes-advbox

# Install dependencies
npm install

# Lint
npm run lint

# Build
npm run build

# Link to your local n8n installation
npm link
# In your n8n installation directory:
npm link n8n-nodes-advbox
```
